ABOUT ME

Full Stack Developer with hands-on experience building web applications using React, Node.js, and Python. Developed multiple projects including AI-based applications, retail systems, and full-stack platforms. Passionate about building scalable products and continuously learning modern technologies.

EDUCATION

NxtWave Disruptive Technologies 2024-2025
Industry Ready Certification in Full Stack Development

AVN Institute Of Engineering&Technology,Ranga Reddy 2021-2025
B Tech(Bachelor of technology)Computer Science(CGPA:7.24)

Krishnaveni Junior College,Hyderabad 2019-2021
Intermediate_MPC(91%)

Zilla Parishad High School 2018-2019
Secondary School Certificate(CGPA:9.2)

SKILLS

Frontend: HTML,CSS,Bootstrap,JavaScript,ReactJs.

Backend: ExpressJs,NodeJs.

Database: MongoDB**,**SQLite.

Programming:C Language,Python**,**Java Basics.

PROJECTS

Food Delivery App – Swiggy/ Zomato Clone (https://ramkitchen.ccbp.tech/)

Tech: React.js, Node.js, MongoDB

- Developed a full-stack food ordering platform with authentication and dynamic menu system.
- Implemented cart management and order tracking functionality.
- Built REST APIs using Node.js and Express.

Library Management System – Web Application (https://librarymngmtram.ccbp.tech/**)**

Tech: HTML, CSS, JavaScript

- Developed a responsive application for managing books and library records.
- Implemented features such as book search, add book, and delete functionality.
- Designed a clean and interactive user interface.

Mental Health Companion – AI Web App (https://github.com/Ram0770/Mentalhealth-Companion)

Tech: Python, Django, HTML, CSS, JavaScript, Firebase

- Developed an AI-based mental health assistant with mood tracking features.
- Integrated sentiment analysis and recommendation system using machine learning libraries.
- Built the backend using Django and deployed the application using PythonAnywhere.

Smart Retail App – AI Retail System (https://github.com/Ram0770/Smart-Retail_Major-Project)

Tech: Python, Flask/Django, MySQL, HTML, CSS, JavaScript

- Developed a retail analytics system for product management and sales tracking.
- Implemented machine learning models for sales forecasting and stock prediction.
- Integrated MySQL database to manage product and sales data efficiently.

Certifications

Full Stack Development with MERN Specialization
NxtWave Disruptive Technologies | 2025

Data Science & Analytics
HP LIFE (HP Foundation) | 2026

Cloud Computing – Finishing School for Employability
Infosys Foundation & ICT Academy | 2024

Data Science Bootcamp
Jobaaj Learning | 2025
